

MAKE THE MOST OF EVERY SEASON

FLEXIBILITY AND CONTROL. THAT'S PRECISION™

orica.com

PRECISION™

WE GIVE YOU GREATER CONTROL

Orica leverages the innovation, insights and technical support developed in the supply of specialist nitrogen products to provide a more flexible approach to farming. By enabling farmers to adjust and adapt to the prevailing conditions, our Precision™ fertilisers can increase agricultural efficiency, improve crop yields and manage risk so you can make the most of every season.

RIGHT THERE, WHEN YOU NEED IT.

A farm needs a supply it can count on.

Orica offers a more responsive supply chain with manufacturing plants in Yarwun, Kooragang Island and Moree, and close partnerships with local distributors. We appreciate you need a supply which will reach you on time, every time. So, we have a dedicated fleet which provides safe and reliable delivery direct to farms along the East Coast of Australia.

WITH YOU ALL THE WAY

We continually support you with our technical know-how.

Our deeper level of understanding comes from Orica's vast experience in the manufacture and supply of specialist nitrogen products across a range of industries. Our field technicians provide your people with application support that reduces risk and increases farming productivity. We also carry out local field trials to provide you with evidence-based insights that can improve your nitrogen application and ultimately your crop yield. We're with you for the long-term.

A SAFER APPROACH TO FERTILISER

Orica's number one priority is simple – safety.

We have years of experience in the manufacturing, transportation and handling of dangerous goods. Our technical field teams work collaboratively with you, providing the tools and skills to handle Ammonia on site. This ongoing training and support ensures you and your people adopt the safest practices, every day.

NO ONE UNDERSTANDS YOUR CROP LIKE YOU DO

Our Precision™ specialist nitrogen fertilisers provide you with choice, giving you the control you need to make the most of the conditions throughout the crop lifecycle. We offer Precision™ UAN and Precision™ Ammonia depending on you and your farm's specific requirements.

ALL YEAR ROUND

We give you greater control – across your applications, your crops and your productivity.

By aligning local manufacture with a more robust supply chain, deeper technical understanding and the highest levels of safety, we take a holistic approach to nitrogen fertilisers, helping to ensure business continuity for you and your farm all year round.

Talk to us today and make the most of every season.

PRECISION™ UAN

Precision™ UAN gives you the flexibility to make the most of your conditions. Offering greater accuracy through a range of applications, farmers can meet crop demand at any stage. Precision™ UAN can be applied with selected liquid crop protection and nutrition products, allowing for greater operational efficiency. Its ease of use allows farmers to take a more strategic approach to improving crop yields. It can also be stored safely and securely across seasons, providing greater economy over the longer term. Manufactured locally and delivered direct to farms through a dedicated fleet, we can supply you when you need it.

PRECISION™ AMMONIA

Offering the highest concentration of nitrogen, Precision™ Ammonia allows you to apply higher rates of nitrogen across your crop, more effectively. With dual supply coming from Newcastle and Gladstone and a dedicated fleet on hand to deliver direct to your farm, we can deliver Precision™ Ammonia when you need it most. You're able to utilise your farming equipment and labour to cover larger areas in grain and cotton production. Our technical field team is on hand to provide your people with the support they need to handle Ammonia safely.

Specialists in Nitrogen

Orica's experienced team understands the seasonal needs of farmers. As a specialist nitrogen supplier to a broad spectrum of industries, our commitment to continuous R&D ensures the farmers we serve have greater control over their applications and their crop.
