

STRATEGY WITH PRECISION™

THE FLEXIBLE APPROACH TO IMPROVING CROP PERFORMANCE

Precision™ UAN gives you the flexibility to make the most of every season. Offering greater accuracy and a diverse range of applications, farmers can meet crop demand at every growth stage. A Urea Ammonium Nitrate formulation suitable for all summer and winter cropping applications, Precision™ UAN is a versatile source of nitrogen nutrition for all crop types. Farmers know it's the cost-effective choice.

If you take a strategic approach to nitrogen applications on your farm, Precision™ UAN will provide the greater accuracy, greater flexibility and product efficiency you demand in a more economic way.

TO BE PRECISE

Precision™ UAN offers greater control, so you can focus on applying protein building Nitrogen in a more strategic way.

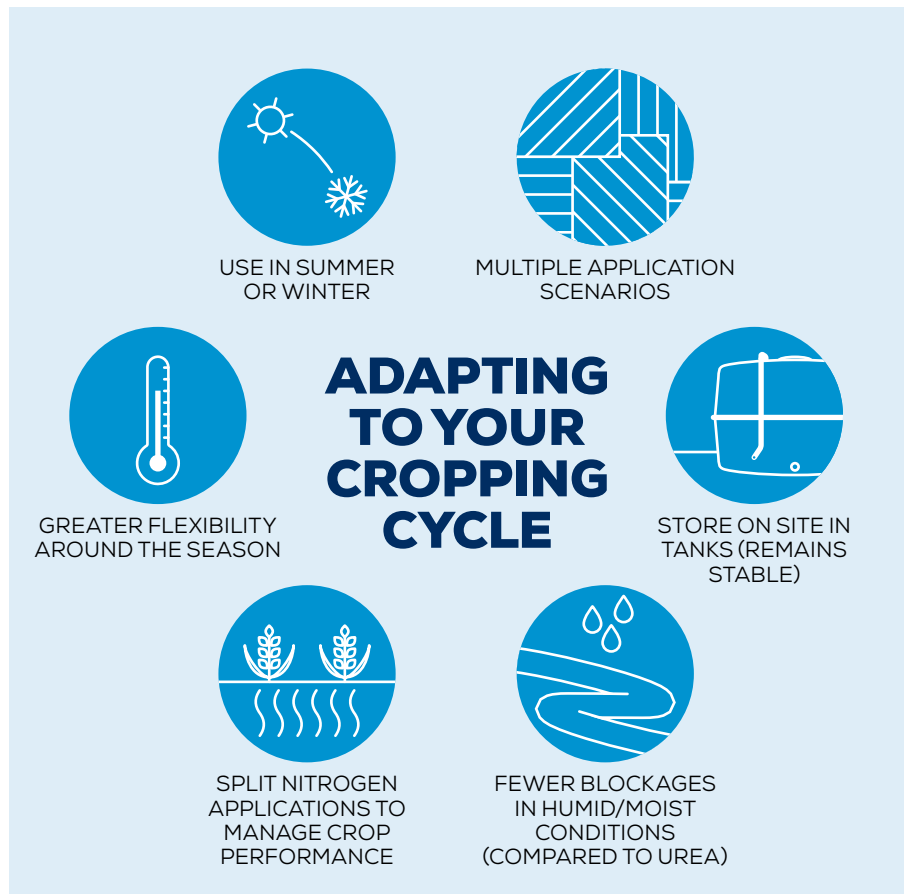

Flexibility that minimises risk

This versatile nitrogen source allows for targeted applications to meet crop demand at any growth stage, from pre-plant to post emergent. It can be delivered by liquid in-furrow, injection, irrigation or boom spray.

A more efficient approach

Precision™ UAN can be applied with selected liquid crop protection and nutrition products, allowing for greater operational efficiency. It's compatible with many nutrients and agricultural chemicals (always refer to compatibility charts for all product mixes prior to application):

- Phosphorus
- Potassium
- Micronutrients
- Other essential plant nutrients

STRATEGY WITH PRECISION™

In addition, Precision™ UAN can also be blended with other crop protection agents, targeting specific needs of a soil or crop

Economies of scale

Precision™ UAN remains stable from one year to the next compared to granular urea storage. So, you're able to split nitrogen applications in accordance with the seasonal conditions and yield potential. When you've decided your crops have had enough, store it away on site until next year, or next crop.

SUPPLY YOU CAN COUNT ON

Orica offers a more responsive supply chain with manufacturing plants in Yarwun, Kooragang Island and Moree and close partnerships with local distributors. We appreciate you need a Nitrogen supply which will reach you on time, every time. So, we have a dedicated fleet, which provides safe and reliable delivery direct to farms along the East Coast of Australia. When you need us, we're there for you.

WITH YOU ALL THE WAY

Our deeper level of understanding comes from Orica's vast experience in the manufacture and supply of specialist nitrogen products across a range of industries. Our field technicians provide your people with application support and we also carry out independent and comprehensive local field trials. These trials provide evidence-based insights that can improve your nitrogen application program and ultimately your crop yield.

We're with you for the long-term

SAFETY FIRST. ALWAYS.

Safety is our number one priority. We have years of experience in the manufacturing, transportation and handling of dangerous goods. Our experienced technical field team works with you, ensuring your people adopt the safest practices, every day.

ALL YEAR ROUND

Precision™ UAN gives you greater flexibility – across your applications and your crops.

Talk to us today and make the most of every season.
