

Maxicharger™

RAPID, INDEPENDENT CHARGING

The Maxicharger™ bulk delivery system is an independent, fully featured charging unit designed for development and production charging in underground mining and construction applications. The Maxicharger™ has the ability to deliver a range of Subtek™ products and provides full control of product charging enabling accurate loading of blast designs.

SPECIFICATIONS

Capacity	2000–5000 kg
Tare weight	10300 kg
Delivery rate	80 kg/min
Hose (Dia x length)	19 mm x 80 m
Dimensions (L x W x H)	8.85 x 2.5 x 3.25 m
Product types	Subtek™ range, Civec™ range
Features	Elevating work platform, mechanical hose handling, Orica ISIC controller
Options	Twin hoses, twin pumps, Roboarm™ radio remote control

KEY BENEFITS

- A self-powered vehicle designed to provide independent charging capabilities.
- A range of product densities can be loaded to suit blasting needs.
- Load into long upholes and downholes typical in underground mining.
- Delivers at high pump rates of up to 80 kg per minute.
- Contains up to 5000 kg of emulsion at a range of product densities.
- Suitable for most underground applications including production, development and construction charging.
- Available as part of the total loading service offered by Orica.
- A highly mobile charging system with an integrated elevating work platform and mechanical hose handling system driven by the vehicles engine. This enables rapid setup and relocation between blast sites.
- Features the Orica inherently safe pumping system, which has been proven reliable over the last 25 years.
- A low maintenance system with reduced downtime, high availability.
- Designed to improve occupational health and safety by reducing the transport and manual handling of explosives.
