

Subtek™

MAXIMUM RELIABILITY, IMPROVED PRODUCTIVITY

The Subtek™ Bulk System is a range of variable energy, bulk emulsion explosives designed for underground mining applications. The Subtek™ range includes products tailored to meet the specific challenges of both production and development blasting.

Product	Application	Density
Subtek™	Development and Production charging	0.80 – 1.20 g/cc
Subtek™ Eclipse™	Reactive ground charging	0.80 – 1.20 g/cc

FEATURES AND BENEFITS

- Energy can be tailored to match ground conditions and the application.
- Water resistant.
- Engineered product and delivery systems designed to ensure safety, accuracy and productivity.
- Simplified site logistics including storage, handling and security.
- Reduced environmental impact.

The Subtek™ Bulk System provides a range of products and delivery systems for mine development and production blasting, including both upholes and downholes.

The increased speed of charging and improved mobility when using the Subtek™ Bulk System, improves productivity and delivers flexibility in underground mines. Total cost, security and safety issues associated with the storage and handling of packaged explosives are eliminated when using the Subtek™ Bulk System.

The energy of the Subtek™ Bulk Products can be tailored to suit the application as it is manufactured at the face by Orica's proprietary delivery systems.
