

SPRINT SERVICE

SAFETY, PRODUCTIVITY AND QUALITY

The SPRINT team reinforces Orica's commitment to providing greater productivity and flexibility for our customers through the introduction of campaign services that can be tailored to meet the unique needs of each operation.

SPRINT service includes:

- Total Loading Service
- Down the Hole Service
- Partings Loading Service
- Dewatering Service
- Coal Validation Service
- Pre-Split Loading Service
- Flexigel™ Delivery Service.

TOTAL LOADING SERVICE

Our Total Loading Service includes the provision of the MMU™ operator, licensed shotfiring vehicle, shotfirer and blast crew personnel on daily, weekly, or campaign hire basis.

The service can be customised to:

- manage short term peaks in production
- provide flexibility in resource management
- provide blasting solutions to complex geological and environmental problems.

DOWN THE HOLE SERVICE

Our Down the Hole Service includes the provision of the MMU™ and operator to provide additional bulk explosive loading capacity on a daily, weekly or campaign hire basis.

The service can be customised to provide additional down the hole support to increase productivity of existing fleet on site.

PARTINGS LOADING SERVICE

Our Partings Loading Service (typically <5 m blast hole depths) is available on a blast by blast hire service. This service includes the provision of an MMU™ (Flexmaster™ or Quarrymaster™) with twin hose loading for high productivity, MMU operator, 2 x hose personnel and relevant blast crew when priming is required.

The service can be customised to:

- assist with productivity of blast loading, allowing your existing resources to stay focused on what they do best, productive loading of large charge weight blast
- potentially double your current loading speed in partings, <5 m blast holes.

DEWATERING SERVICE

Our Dewatering Service includes the provision of a dewatering unit and operator for the dewatering of blast holes on a flexible day/weekly basis.

The service can be customised to:

- manage wet blast holes during wet periods
- manage wet blast holes in the short term
- manage wet blast holes in pre-split loading on final walls.

SPRINT SERVICE

COAL VALIDATION SERVICE

Our Coal Validation Service includes the provision of a logging vehicle fitted with a gamma logging unit. Reports are provided and the service is available on a day hire basis.

The service can be customised to:

- provide raw data for customer interpretation
- provide interpretation and recommendations
- provide a roof of coal position
- provide a full coal block volume
- assist in managing and refining blast design and drilling
- assist with managing coal forecasts
- assist in developing a more accurate coal model
- assist in managing blasted volume and scheduling requirements
- check the accuracy of existing touch-coal drilling.

PRE-SPLIT LOADING SERVICE

Our Pre-Split Loading Service includes the provision of an MMU™ operator and blast crew personnel if priming, and air bagging is required on a day or blast hire basis.

The service can be customised to assist with productivity of blast loading. This service allows your existing resources to stay focused on what they do best, productive loading of large charge-weight blasts.

FLEXIGEL™ DELIVERY SERVICE

Our Flexigel™ delivery service includes the provision of an MMU™ operator, delivery systems for the specialist raw materials and blast crew personnel, if priming is required, on a weekly or blast hire basis.

The service can be customised to:

- deliver variable low density products without the need for capital requirements
- deliver low density bulk to suit the ground required to be blasted
- campaign blast in high fume risk areas of your mine.
