

Independent reasonable assurance
report to the Management and
Directors of Orica Limited (“Orica”)
in relation to compliance with section
19 of the National Greenhouse and
Energy Reporting Act 2007 for the
financial year ended 30 June 2019

Audited body

Name of audited body:	Orica Limited
Name of contact person for audited body:	Meredith Read
Contact person phone number:	+61 3 9665 7310
Contact person email address:	meredith.read@orica.com

Reporting requirements

Total scope 1 emissions for audited body:	1,754,798 tCO ₂ -e
Total scope 2 emissions for audited body:	165,778 tCO ₂ -e
Total energy consumption for audited body:	19,011,793 GJ
Total energy production for audited body:	259,709 GJ

Audit Description

Kind of audit:	Reasonable Assurance
Objective of the assurance engagement:	Assurance on scope 1 greenhouse gas emissions, scope 2 greenhouse gas emissions, energy production and energy consumption in Orica's Energy and Emissions Report under S19 of the NGER Act.
Reporting period covered by audit:	1 July 2018 – 30 June 2019
Date terms of engagement signed:	17 April 2019
Date audit report signed	24 October 2019

Phone Number	+61 3 9288 8121
Address	8 Exhibition Street Melbourne VIC 3000

Part A – Auditor’s conclusion

To: Management and Directors of Orica Limited

We have conducted a reasonable assurance engagement of Orica Limited’s (“Orica”) Energy and Emissions Report for the period 1 July 2018 to 30 June 2019 (the “Energy and Emissions Report”), prepared in accordance with section 19 of the National Greenhouse and Energy Reporting Act 2007.

Details of the audited body

Name of audited body:	Orica Limited
Address	Level 3, 1 Nicholson Street,
ABN	East Melbourne, Victoria Australia 3002

Subject matter

The subject matter for our assurance engagement is Orica’s Energy and Emissions Report for the period 1 July 2018 to 30 June 2019.

The amounts within the Energy and Emissions Report being audited, consists of the following:

- ▶ Scope 1 greenhouse gas emissions of 1,754,798, expressed in tonnes of carbon dioxide equivalent (tCO₂-e)
- ▶ Scope 2 greenhouse gas emissions of 165,778 tCO₂-e
- ▶ Energy consumption of 19,011,793 gigajoules (GJ)
- ▶ Energy production of 259,709 GJ.

Criteria

The criteria are:

- ▶ Section 19 of the National Greenhouse and Energy Reporting Act 2007 (“the NGER Act”)
- ▶ National Greenhouse and Energy Reporting Regulations 2008 (“NGER Regulations”)
- ▶ National Greenhouse and Energy (Measurement) Determination 2008 (“the NGER (Measurement) Determination”).

Management’s responsibility

Management of Orica is responsible for the preparation and presentation of the Subject matter in accordance with the Criteria, and in compliance with Section 19 of the NGER Act. This includes establishing and maintaining internal controls relevant to the preparation and presentation of the Subject matter that are free from material misstatement, whether due to fraud or error.

Management of Orica is responsible for the interpretation and application of the requirements of the NGER Act and the NGER (Measurement) Determination in determining operational control and quantifying emissions and energy, which are reflected in Orica’s “NGER Reporting Manual” and Orica’s “Basis of Preparation for Reporting Nitrous Oxide Emissions from Nitric Acid Plants,” which has been provided to us.

Independence and quality control

In conducting our assurance engagement, we have met the independence requirements of the APES 110 Code of Ethics for Professional Accountants and have complied with the relevant ethical requirements relating to assurance engagements, which include independence and other requirements founded on fundamental principles of integrity, objectivity, professional competence, due care, confidentiality and professional behaviour. These include all of the requirements defined in the NGER Regulations regarding the Code of Conduct, independence and quality control. We have the required competencies and experience to conduct this assurance engagement.

Furthermore, in accordance with Auditing Standard ASQC 1 Quality Control for Firms that Perform Audits and Reviews of Financial Reports and Other Financial Information and Other Assurance Engagements, we maintain a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Auditor's responsibility

Our responsibility is to express a reasonable assurance conclusion as to whether the Subject matter, has been prepared, in all material respects, in accordance with the Criteria.

We have conducted our reasonable assurance engagement in accordance with:

- ▶ National Greenhouse and Energy Reporting (Audit) Determination 2009 ("NGER (Audit) Determination")
- ▶ ASAE 3000 Assurance Engagements Other than Audits or Reviews of Historical Financial Information
- ▶ ASAE 3410 Assurance Engagements on Greenhouse Gas Statements
- ▶ ASAE 3100 Compliance Engagements.

The NGER (Audit) Determination and above relevant national and international standards require that we plan and perform this engagement to obtain reasonable assurance about whether the Energy and Emissions Report is free from material misstatement.

A reasonable assurance engagement involves performing procedures to obtain assurance evidence about the Subject matter being audited. The procedures selected depend on the audit team leader's judgement, including an assessment of the risks of material misstatement or material non-compliance of the matter being audited, whether due to fraud or error. In making those risk assessments, we consider internal controls relevant to Orica's determination of the amounts and disclosures in the matter being audited in order to design assurance procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Orica's internal controls. A reasonable assurance engagement also includes evaluating the reasonableness of emissions and energy estimates made by management of the company as well as evaluating the overall presentation of the Subject matter.

We believe that the assurance evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Summary of procedures undertaken

The procedures we conducted in our reasonable assurance engagement included, but were not limited to the following:

- ▶ Gaining an understanding of the greenhouse gas and energy reporting processes supporting the business activities of Orica

- ▶ Conducting visits to selected sites (Kooragang Island Yarwun Mining Chemicals and Yarwun Nitrates) to identify sources of greenhouse gas emissions, energy consumption and energy production and understand the basis for measurement and preparation of the Energy and Emissions Report
- ▶ Conducting interviews and collating evidence to understand processes and controls supporting preparation and presentation of the Energy and Emissions Report
- ▶ Checking documentation in support of operational control decisions
- ▶ Checking that methodologies have been correctly applied in accordance with the requirements in the NGER (Measurement) Determination
- ▶ Testing the aggregation of application data by emission stream and disaggregation of data by reporting category
- ▶ Testing the compliance and calculations performed by the company in accordance with method 2 for nitric acid production, sodium cyanide production and natural gas combustion
- ▶ Undertaking analytical review procedures to identify anomalies in data presented
- ▶ Identifying and testing assumptions supporting the calculations
- ▶ Testing, on a sample basis, to underlying source information to check completeness and accuracy of the Energy and Emissions Report
- ▶ Reviewing the appropriateness of the presentation of the information.

Use of our reasonable assurance engagement report

This Report has been prepared for the Management and Directors of Orica, and for the Clean Energy Regulator, for the sole purpose of reporting on Orica's Energy and Emissions Report and its compliance with the NGER Act. Accordingly, we disclaim any assumption of responsibility for any reliance on this report to any persons or users other than the intended users, or for any purpose other than that for which it was prepared.

Inherent limitations

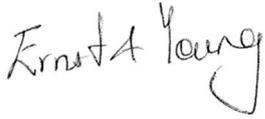

There are inherent limitations in performing assurance – for example, assurance engagements are based on selective testing of the information being examined – it is possible that fraud, error or non-compliance may occur and not be detected. A reasonable assurance engagement is not designed to detect all instances of non-compliance with the Criteria, as a reasonable assurance engagement is not performed continuously throughout the period and the procedures performed in respect of compliance with the Criteria are undertaken on a test basis. The conclusion expressed in this Report has been formed on the above basis.

Additionally, non-financial data may be subject to more inherent limitations than financial data, given both its nature and the methods used for determining, calculating and sampling or estimating such data. We specifically note that Orica has used estimates or extrapolated underlying information to calculate certain amounts included within the greenhouse gas and energy information.

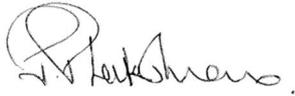

Our conclusion

In our opinion the Subject matter as set out in Orica's Energy and Emissions Report for the period 1 July 2018 to 30 June 2019 has been prepared in accordance with Section 19 of the NGER Act, in all material respects.
