

## SUSTAINABILITY

Orica's value of No Accidents Today underpins our commitment to the safety, health and wellbeing of our people, customers, the environment, and the communities in which we operate.

During 2014, Orica continued to strengthen processes and procedures which support ongoing improvement in sustainability performance. Progress also continues to be made in addressing legacy issues associated with historical operations.

Risk management is a fundamental pillar of Orica's activities, including the identification and management of its safety, health, environment and community risks. Orica has robust processes in place to undertake risk management systematically across the Company's operations, use of products and delivery of services. A key aspect of Orica's risk management approach is a focus on preventative controls and the effectiveness of those controls.
