

## SUSTAINABILITY REPORTS

View our latest and historical Sustainability Reports and supplementary documents.

Our sustainability reporting is guided by the Core Global Reporting Initiative (GRI) Reporting Standards and references the UN Sustainable Development Goals (SDGs). In our reporting on climate change we follow the guidance provided by the Financial Stability Board's Task Force on Climate-related Disclosures voluntary disclosure framework (TCFD). We report GHG emissions, energy consumption and energy production from our Australian facilities under the Australian Government's National Greenhouse and Energy Reporting Act 2007, supporting regulations and relevant guidelines.
